# <u>ADFS 3.0</u>

## **Duration: - 4 Days**

## Level: - 400

#### Introducing Claim Based Identity

- Introducing claims-based identity
- Section 2 Sectio
- The benefits of claims-based identity
- The evolution of Active Directory<sup>®</sup> Federation Services (AD FS)
- Use cases for AD FS
- AD FS and claims-based terminology

#### **ADFS Prerequisites**

- Windows<sup>®</sup> prerequisites
- Introducing directory services
- Active Directory<sup>®</sup> and Active Directory<sup>®</sup> Lightweight Directory Services (AD LDS)
- Web services, standards, and interoperability
- Internet Information Services (IIS)

#### Public Key Infrastructure (PKI)

- Introducing Public Key Infrastructure
- PKI basics
- Introduction to cryptography
- PKI design
- Installing and configuring certificate services

#### **ADFS Component**

- The Federation Server role
- Claim types, endpoints, and attribute stores
- Active Directory<sup>®</sup> Federation Services (AD FS) security
- The Federation Server proxy role
- Administering AD FS

Windows<sup>®</sup> Identity Foundation (WIF)

## **Claim Based Authentication in single organization**

- Preparing for Active Directory<sup>®</sup> Federation Services (AD FS) in a single organization
- AD FS within a single organization
- Understanding claims and claim types
- Claim rules and claim rule templates
- Creating claim rules from templates
- Sconfiguring AD FS in a single organization

## Claim Based Authentication in Business to Business (B2B)

- Deploying AD FS in a federated environment
- Configuring a claims provider trust
- Understanding home realm discovery
- Managing claims across organizations

#### **Advance ADFS Deployment Scenarios**

- Implementing the Federation Server (FS) proxy
- Web Application Proxy
- Planning for high availability
- Additional Active Directory<sup>®</sup> Federation Services (AD FS) configuration scenarios
- AD FS 2.0 and Security Assertion Markup Language (SAML) interoperability
- OATH 2.0
- Multifactor Authentication
- Claim unaware application
- Group Managed Service Account

#### **ADFS Claim Rule Language**

- Reviewing the claims life cycle and claims engine
- Introducing the claim rule language

#### ADFS with Office365

- Planning ADFS deployment for Office365
- Deploying ADFS for identity federation with Office 365

Planning and Implementing hybrid Solutions for Office 365

# **Device Registration Service (DRS)**

- Sconfiguring Resource Access for Device that are note domain Joined
- Configuring Workplace Join

## **ADFS Troubleshooting**

- Configuring auditing for AD FS
- AD FS troubleshooting
- Tracing AD FS traffic
